Professional Summary

Computer Science and Engineering undergraduate specializing in Artificial Intelligence, with hands-on experience in full-stack application development, backend engineering, and applied machine learning. Proficient in JavaScript, TypeScript, React.js, Angular, Node.js, NestJS, and PostgreSQL. Experienced in designing REST APIs, modular backend architectures, database-driven applications, and machine learning workflows. Interested in building scalable software products and practical AI-powered solutions.

Education

University of Engineering & Management, Kolkata — Kolkata, India

B.Tech – Computer Science & Engineering (Artificial Intelligence) — *2024 – Present*

- SGPA: 8.0 (up to 4th Semester)

Nabadwip Bakultala High School — West Bengal, India

Higher Secondary – WBCHSE — *2024*

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python, Java, SQL
- **Frontend Development:** React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Node.js, Express.js, NestJS, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, Redis
- **AI / Machine Learning:** PyTorch, Pandas, NumPy, Scikit-learn, Machine Learning Fundamentals
- **Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code, Jupyter Notebook

Experience

Web Development Intern — May 2025 – Nov 2025

DAS SOLUTIONS | Certificate — *Indore, Madhya Pradesh*

- Developed responsive web application interfaces using React.js, Angular, TypeScript, and Tailwind CSS.
- Integrated RESTful APIs and implemented client-side routing, application state management, and Angular Reactive Forms.
- Debugged application issues, improved frontend functionality, and collaborated with developers using Git-based workflows.

Projects

AlignX – AI-Powered Student Career Platform — *AI / Full Stack*

- Working on an AI-powered student platform focused on profile matching, career recommendations, and skill-gap analysis.
- Explored machine learning approaches for matching student profiles with relevant academic requirements, skills, and opportunities.
- Worked with structured student data and feature preprocessing to support recommendation workflows.

Smart Retail and Demand Intelligence — *Machine Learning / PyTorch*

- Contributed to a team-based machine learning project focused on retail intelligence and predictive analytics.
- Developed a three-layer Multi-Layer Perceptron (MLP) architecture for customer churn classification using PyTorch.
- Worked on model architecture, training workflow, and classification evaluation in Google Colab.
